(1) As compared to the prior year period.

(2) The comparable store sales operating metric is the percentage change in sales of comparable stores period over period. A store is considered comparable on the first day of the 13th full month of operation. When a store is relocated, it is excluded from the comparable store sales calculation. Comparable store sales includes total charges to customers less any actual returns. The Company includes the change in allowance for anticipated sales returns applicable to comparable stores in the comparable store sales calculation. Comparable store sales data reported by other companies may be prepared on a different basis and therefore may not be useful for purposes of comparing the Company’s results to those of other businesses. Company management believes the comparable store sales operating metric provides useful information to both management and investors to evaluate the Company’s performance, the effectiveness of its strategy and its competitive position.

SECOND QUARTER 2021

Net Sales

Net sales increased \$28.5 million, or 42.0%, to \$96.2 million in the second quarter of 2021 from \$67.7 million in the second quarter of 2020. The sales results during the three months ended June 30, 2020 were adversely impacted by the onset of COVID-19 in the United States and the shelter in place restrictions implemented by many state and local governments in response to the pandemic. This resulted in store closures, reduced store hours, lower levels of traffic and an overall decrease in sales during the three months ended June 30, 2020. Over the last year, we have seen restrictions ease, the rollout of a vaccinations in the United States, and strong demand trends for home improvement products. These factors combined with the execution of the Company’s strategy have helped drive improvements in traffic and average ticket resulting in a 41.6% increase in sales at comparable stores.

Gross Profit

Gross profit increased \$21.0 million, or 46.3%, to \$66.4 million in the second quarter of 2021 from \$45.4 million in the second quarter of 2020, primarily due to an increase in sales. The gross margin rate was 69.1% and 67.1% for the three months ended June 30, 2021 and 2020, respectively. The increase in gross margin rate was primarily driven by better pricing and an improvement in customer delivery collection rates during the three months ended June 30, 2021 compared to the three months ended June 30, 2020.

Selling, General and Administrative Expenses

Selling, general and administrative (“SG&A”) expenses increased \$11.6 million, or 24.6%, to \$58.8 million in the second quarter of 2021 from \$47.2 million in the second quarter of 2020. The increase in selling, general and administrative expenses is largely due to a \$6.2 million increase in variable selling expenses, a \$1.5 million increase in transportation costs, a \$1.5 million increase in wages largely due to an increase in headcount, a \$0.9 million increase in consulting and temporary labor costs, and a \$0.5 million increase in marketing expenses.

Provision for Income Taxes

The provision for income taxes increased \$3.6 million to \$2.0 million of income tax expense in the second quarter of 2021 from an income tax benefit of \$1.6 million during the second quarter of 2020. The increase in the provision for income tax was largely due to the increase in income before taxes. Our effective tax rate for the quarter ended June 30, 2021 and 2020 was 26.4% and 67.7%, respectively. The Company’s effective tax rate during the quarter June 30, 2020 included adjustments resulting from the enactment of the Coronavirus Aid, Relief, and Economic Security Act (the CARES Act), which gave the Company the ability to carry back federal net operating losses to years with a federal statutory rate of 35%.

Inventory

Inventory decreased \$5.4 million to \$68.9 million at the end of the second quarter in 2021 from \$74.3 million at the end of the fourth quarter of 2020.

NON-GAAP INFORMATION

Adjusted EBITDA

Adjusted EBITDA for the second quarter of 2021 was \$15.4 million compared with \$6.6 million for the second quarter of 2020. See the table below for a reconciliation of GAAP net income to Adjusted EBITDA.

Non-GAAP Financial Measures

The Company calculates Adjusted EBITDA by taking net income calculated in accordance with GAAP, and adjusting for interest expense, income taxes, depreciation and amortization, and stock-based compensation expense. Adjusted EBITDA margin is equal to Adjusted EBITDA divided by net sales. The Company calculates Pretax Return on Capital Employed by taking income (loss) from operations divided by capital employed. Capital employed equals total assets less accounts payable, income taxes payable, other accrued liabilities, lease liability and other long-term liabilities. Other companies may calculate both Adjusted EBITDA and Pretax Return on Capital Employed differently, limiting the usefulness of these measures for comparative purposes.

The Company believes that these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to the Company's financial condition and results of operations. Company management uses these non-GAAP measures to compare Company performance to that of prior periods for trend analyses, for purposes of determining management incentive compensation, for budgeting and planning purposes and for assessing the effectiveness of capital allocation over time. These measures are used in monthly financial reports prepared for management and the Board of Directors. The Company believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends and in comparing the Company's financial measures with other specialty retailers, many of which present similar non-GAAP financial measures to investors.

Company management does not consider these non-GAAP measures in isolation or as an alternative to financial measures determined in accordance with GAAP. The principal limitations of these non-GAAP financial measures are that they exclude significant expenses and income that are required by GAAP to be recognized in the Company's consolidated financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgments by management about which expenses and income are excluded or included in determining these non-GAAP financial measures. In order to compensate for these limitations, management presents non-GAAP financial measures in connection with GAAP results. The Company urges investors to review the reconciliation of these non-GAAP financial measures to the comparable GAAP financial measures and not to rely on any single financial measure to evaluate the business.

IMPACT OF THE COVID-19 PANDEMIC

In March 2020, the World Health Organization declared the COVID-19 outbreak a global pandemic. COVID-19 has negatively impacted public health and the global economy, disrupted global supply chains, and created volatility in financial markets. The continuing implications of COVID-19 on the Company remains uncertain and will depend on certain future developments, including the duration, scope and severity of the pandemic and the effects of new variants of COVID-19, some of which may be more virulent or transmissible than the initial strain; its impact on the Company's employees, customers and suppliers; the range and timing of government mandated restrictions and other measures, including the reimposition of previously lifted measures or imposition of new measures; and the success of the deployment and widespread adoption of approved COVID-19 vaccines and their effectiveness against new variants of COVID-19. This uncertainty could have a material impact on the accounting estimates and assumptions utilized to prepare the Company's consolidated financial statements in future reporting periods, which could result in a material adverse impact on the Company's financial position, results of operations and cash flows.

The COVID-19 pandemic had a significant impact on the Company's operations during 2020. For instance, the Company experienced a sharp decline in traffic toward the end of the first quarter of 2020 following the onset of COVID-19 in the United States. In response, the Company took steps to reduce SG&A expenses by eliminating a portion of its workforce, reducing store hours, curtailing advertising spending, reducing the number of replenishment trucks sent from the Company's distribution centers to its stores and limiting other SG&A spending when possible. As state and local governments started lifting restrictions toward the end of the second quarter of 2020, the Company saw an improvement in traffic and sales trends. Throughout the remainder of 2020, the Company took a cautious approach to investing in activities that would increase its SG&A expenses, which included operating its stores at a reduced hours schedule compared to the prior year. The Company also started experiencing elevated levels of product outages during second half of 2020 due to vendor production delays and other disruptions in its supply chain related to COVID-19.

The Company continued to experience elevated levels of product outages, which were partially due to vendor production delays and global shipping capacity constraints resulting, in part, from the impact of COVID-19. The Company continues to actively work with its vendors to secure delivery of backordered product.

While the Company is cautiously optimistic with the current business trend and the progress made distributing COVID-19 vaccinations in recent months, the continued sporadic outbreaks of COVID-19 cases occurring globally, as well as the ongoing spread of new COVID-19 variants, could have a negative impact on the Company. Specifically, the Company could be adversely impacted by limitations on its employees to perform their work due to illness caused by the pandemic or local, state or federal orders requiring stores to close or employees to remain home; limitations of carriers to deliver the Company's products to customers; product shortages; limitations on the ability of the Company's customers to conduct their business and purchase the Company's products and services; and limitations on the ability of the Company's customers to pay the Company in a timely manner. These events could have a material adverse effect on the Company's results of operations, cash flows and liquidity. In addition, even after the COVID-19 pandemic has subsided, the Company may continue to experience adverse impacts to its business as a result of the economic impact of the pandemic.

WEBCAST AND CONFERENCE CALL
